

PG course in Chemistry

PG course in Chemistry is commencing from the current academic year (2016-17). The course is affiliated to Bangalore University. Admissions are open. Applications can be collected from the college office or can be downloaded from the website.

Two-year post graduate course in Chemistry (Organic Chemistry)

We help students utilize their two years study productively to develop a healthy appetite for research, to become capable of competing with the best talent in the country and acquire skills which will equip them to find gainful employment in industry and academia.

1. MSc. Organic Chemistry

The two-year (four semesters) Masters Programme in Chemistry (specialization in Organic Chemistry) aims at providing a comprehensive study of chemistry to develop a critical and analytical approach to the subject. The first two semesters deal with different branches of chemistry followed by the specialization papers of organic chemistry along with an industrial/institutional project in the last two semesters. Equal importance is given to both theory and practicals. The teaching methodology includes lecture, demonstration, seminars, internships.

Salient features:

- **Affiliated to Bangalore University**
- **Centrally located campus, well connected by public transport**
- **Good library and internet facilities**
- **Recognized as Research Centre by Bangalore University**
- **Amenities like spacious labs, smart classrooms, library resources, seminar halls, cafeteria, etc**
- **Experienced and well qualified faculty**
- **Lectures, Seminars, Workshops, Group Discussion and guest lectures by experts**
- **Placement opportunities**
